PROJECTS

Aspirelink(Job portal Application)

<https://job-portal-mern-s71v.onrender.com/>

Built with the MERN stack, my project is a dynamic job portal website. Users can effortlessly search and apply for jobs, while employers can post job listings and manage applications. The platform includes secure user authentication, resume uploads, and a responsive front-end for a seamless experience.

- Integrated Node.js to create the backend of the application, utilizing RESTful APIs and MongoDB for data storage.
- Users can search and apply for jobs, while employers can post job listings and manage applications.
- Implemented user authentication and authorization for secure access.
- features for job seekers to upload resumes and for employers to review applications.
- Utilized React.js for creating a responsive and interactive front-end.
- GitHub** Repository:- <https://github.com/ahammedkabber/Aspirelink>

LMS (Education Platform)

<https://job-portal-mern-s71v.onrender.com/>

Developed an LMS site with MongoDB and Node.js

- Developed an MERN-based lms website with admin and user interfaces.
- Users can create accounts, manage Wishlist, cart, and make purchases with various payment options.
- Utilized JavaScript for frontend and MongoDB for the database
- Implemented secure user authentication and authorization features.
- GitHub** Repository:- <https://github.com/Ahammedkabeer/lms-website>

SKILLS

Client-Side

HTML5 CSS JS Tailwind React

JSX Redux TypeScript Next.js

react-router Flowbite Bootstrap

Axios Webpack Figma Babel

Material Tailwind Handlebars Ejs

Server-side

JavaScript Express Node.Js AWS

TypeScript Mongoose MongoDB ES6

MySQL JWT MVC Architecture

Clean Architecture JSON Ajax HTTP/2

Development & Operations

GIT Firebase CloudFlare Cloudinary

Multer Node mailer Twilio Stripe

Razorpay Nginx Postman Vscode

PayPal Chart.js pdfkit

MINI PROJECTS

Stack Technology Center Official Website

Developed the official website for Stack Technology Center using the MERN stack (MongoDB, Express.js, React.js, Node.js). Implemented user authentication, an admin panel for content management, and ensured a responsive, dynamic interface. This project demonstrates my skills in full-stack development and creating robust web applications.

GitHub Repository:- <https://github.com/kabeerkebi/dynamic-mern-website>

Book Store

Developed an online bookstore application using the MERN stack (MongoDB, Express.js, React.js, Node.js). Enabled store owners to add edit, and delete, books through a user-friendly interface. This project demonstrates my ability to create full-stack applications with robust CRUD functionality.

GitHub Repository:-<https://github.com/kabeerkebi/Book-store-app>

Tic-Tac-Toe Game

Created an interactive Tic-Tac-Toe game using React.js. The game features a clean and responsive user interface, allowing two players to compete. Implemented game logic, state management, and dynamic updates to enhance the user experience. his project showcases my skills in front-end development and React.

GitHub Repository:- <https://github.com/kabeerkebi/tik-tak-tok->

Shoes E-commerce Website

Created a visually appealing and responsive shoes e-commerce website using JavaScript. Designed with a focus on user experience, the site includes product listings with the option to add items to a shopping cart. Implemented intuitive navigation and a modern interface for seamless browsing on various devices. This project showcases my skills in front-end development, emphasizing design principles and interactive functionality.

CERTIFICATION

Dubai Government Certification Achievement

Achieved KHDA certification in Full Stack Web Development, showcasing proficiency in front-end and back-end technologies highlighting commitment to professional growth in web solutions.

Professional Software Development Certification

Successfully completed the Professional Software Development certification program accredited by Skill India and assessed by Stack Technology Center. This program provided in-depth training on modern software technologies, enhancing my skills fullstack development, and equipping with industry-recognized expertise.

UDEMY REMOTE

Completed "The Complete 2024 Web Development Bootcamp" on Udemy, gaining proficiency in modern web technologies and frameworks, enhancing skills in both front-end and back-end development.
